

BUSINESS INSIGHTS REPORT

Sales Performance Dashboard

Prepared By	Ekta Sain
Project	Sales Performance Dashboard
Tools Used	Power BI, DAX, Google Colab (Python)
Year	2026

A data analytics project focused on understanding sales performance, product performance, regional trends, and customer behavior through interactive business intelligence reporting.

Prepared as part of a Data Analytics Portfolio Project

1. Executive Summary

This report summarizes the findings from the Sales Performance Dashboard. The project combines data analysis performed in Google Colab with an interactive Power BI dashboard. The analysis focuses on sales trends, regional performance, product performance, customer behavior, and customer segments.

2. Project Objectives

The main objectives of this project were to:

- Analyze overall sales and business performance.
- Identify sales trends over time.
- Compare performance across regions and product categories.
- Identify top-performing products and customers.
- Analyze customer segments and purchasing behavior.

3. Tools and Technologies

Tool	Purpose
Google Colab / Python	Data preparation and exploratory analysis
Power BI	Interactive dashboard development and data visualization
DAX	Creation of KPIs and calculated measures
CSV Dataset	Source sales data

4. Key Performance Indicators

The dashboard uses the following KPIs to summarize business performance: Total Sales, Total Profit, Total Orders, Total Customers, Average Order Value, Total Quantity Sold, and Average Sales per Customer.

5. Key Business Insights

1. Canon imageCLASS 2200 Advanced Copier is the top-selling product.
2. Sean Miller is the top customer based on total sales.
3. The Consumer segment generates the highest sales.
4. The West region is the best-performing region.
5. Technology is the top-performing product category.

6. Dashboard View: Sales Performance Overview

The first dashboard page provides a high-level overview of sales performance, including KPI cards, monthly sales trends, regional sales performance, and category-wise sales.

Figure 1: Sales Performance Dashboard – Sales Overview

7. Dashboard View: Product & Customer Insights

The second dashboard page focuses on product and customer performance. It includes top products, top customers, sales by customer segment, interactive filters, and summarized business insights.

Figure 2: Sales Performance Dashboard – Product & Customer Insights

8. Business Recommendations

- Prioritize inventory and promotional planning for high-performing Technology products.
- Study the West region's performance to identify strategies that may be applied to other regions.
- Continue strengthening engagement with the Consumer segment while exploring growth opportunities in other segments.
- Analyze top products and customers to support targeted sales and marketing decisions.

9. Conclusion

The Sales Performance Dashboard provides a consolidated and interactive view of business performance. The analysis highlights important patterns across products, customers, regions, categories, and segments. The project demonstrates the use of Python for analysis, DAX for KPI calculations, and Power BI for business intelligence visualization.
